

How to change i-MSCP database SQL user password?

Série prior 1.3.x

Run the following commands:

```
# dpkg-reconfigure mysql-server-5.5  
# perl /var/www/imscp/engine/setup/imscp-setup -dar sql
```

You must adapt the **dpkg-reconfigure** command according the SQL server/version you're using.

Serie 1.3.x and greater

Since i-MSCP 1.3.x serie, i-MSCP uses its own SQL user. To update the i-MSCP SQL user password, simply run

```
# perl /var/www/imscp/engine/setup/imscp-setup -dar sql
```
