

How to switch from a service to another (such as courier to dovecot)?

If you are using the master branch

Run the autoinstall script as follow:

```
# perl imscp-autoinstall --reconfigure
```

And then, switch to the desired service by selecting it in the related dialog box.

If you are using a released version

Run the autoinstall script as follow:

```
# perl imscp-autoinstall
```

And then, switch to the desired service by selecting it in the related dialog box.
