

i-MSCP PanelRedirect plugin

Bear in mind that this documentation is for the last available version. If you use an older version, you must refer to the README.md file inside the plugin archive.

i-MSCP PanelRedirect plugin v1.2.0

Provides access to i-MSCP panel (and tools) through standard http(s) ports.

Requirements

- i-MSCP >= Serie 1.4.x

Installation

1. Upload the plugin through the plugin management interface
2. Install the plugin through the plugin management interface

Update

1. Backup your plugin configuration file if needed
2. Upload the plugin through the plugin management interface
3. Restore your plugin configuration file if needed
4. Update the plugin list through the plugin management interface

Usage of `BASE_SERVER_VHOST` (control panel host) as customer domain

Note that if you use `BASE_SERVER_VHOST` (control panel host) as customer domain, the plugin will automatically remove its own vhost files to avoid interfering with the customer vhosts files. In such case, it is up to you to enable the redirect feature for the domain.

Note that here, the `domain` word is used as generic term to designate either a domain, a domain alias, or a subdomain.

Generally speaking, using this plugin when you also use `BASE_SERVER_VHOST` as customer domain doesn't make any sense. In short, this is a NOOP.
