RoundcubePlugins Plugin Documentation

Plugin allows to use Roundcube Plugins with i-MSCP.

Included Roundcube Plugins

additional_message_headers

Adds a header identifying the originating ip for the mails sent via webmail.

archive

Archive plugin adds a new button to the Roundcube toolbar to move messages to an (user selectable) archive folder. The button will only appear after the user configured the Archive folder.

Roundcube user config: Settings → Preferences → Special Folders → Archive

calendar

Calendar plugin is a full calendar for Roundcube.

Roundcube user config: Settings → Preferences → Calendar

contextmenu

Adds context menus to the message list, folder list and address book. Possibility to mark mails as read/unread, delete, reply and forward mails.

dkimstatus

Displays the DKIM Signature status of each mail in Roundcube.

emoticons

Emoticons inserts nice smileys and other emoticons when the appropriate text representations e.g. are discovered in the mail text.

logon_page

Allows to display additional information (HTML code block) at logon page. Configuration: Put your content into the file config-templates/logon_page/logon_page.html. It will be parsed by Roundcube templates engine, so you can use all template features (tags).

managesieve

Uses the managesieve protocol and allows the user to manage his sieve mail rules. A default Spam sieve rule will be created after the user opened the Filters configuration in Roundcube.

Roundcube user config: Settings → Filters

newmail_notifier

Can notify on new mails by focusing browser window and changing favicon, playing a sound and displaying desktop notification (using webkitNotifications feature).

Roundcube user config: Settings → Preferences → Mailbox View

pdfviewer

Roundcube inline pdf viewer.

pop3fetcher

Plugin pop3fetcher allows to add pop3 accounts and automatically fetch emails from them.

Roundcube user config: Settings → Preferences → Other Accounts

tasklist

Task management plugin for Roundcube.

zipdownload

Adds an option to download all attachments of a message in one zip file.

Requirements

- i-MSCP versions >= 1.2.3
- Dovecot
- Roundcube 1.x
- See installation section for required software packages.

Installation

1. Install the needed Debian / Ubuntu packages

Only necessary if you want to use the Roundcube Plugin managesieve.

Attention: Debian Squeeze and Ubuntu Lucid have these binares included with the dovecot package. So on Squeeze and Lucid you don't need to install anything.

```
# aptitude update
# aptitude install dovecot-sieve dovecot-managesieved
```

2. Get the plugin from Plugin Store

http://i-mscp.net/filebase/index.php/Filebase/

3. Plugin upload and installation

- Login into the panel as admin and go to the plugin management interface
- Upload the RoundcubePlugins plugin archive
- Install the plugin

Update

1. Get the plugin from Plugin Store

http://i-mscp.net/filebase/index.php/Filebase/

2. Backup your current plugin config

```
# plugins/RoundcubePlugins/config.php
# plugins/RoundcubePlugins/config-templates/logon_page/logon_page.html
```

3. Plugin upload and update

- Login into the panel as admin and go to the plugin management interface
- Upload the RoundcubePlugins plugin archive
- Update the plugin list

Configuration

For the different configuration options please check the plugin config file.

```
# plugins/RoundcubePlugins/config.php
```

After you made your config changes, don't forget to update the plugin list.

- Login into the panel as admin and go to the plugin management interface
- Update the plugin list
