

i-MSCP ServerDefaultPage plugin

Bear in mind that this documentation is for the last available version. If you use an older version, you must refer to the README.md file inside the plugin archive.

i-MSCP ServerDefaultPage plugin v1.3.0

Provides Apache2 server default page.

Requirements

- i-MSCP >= Serie 1.4.x

Installation

1. Upload the plugin through the plugin management interface
2. Install the plugin through the plugin management interface

Update

1. Backup your plugin configuration file if needed
2. Upload the plugin through the plugin management interface
3. Restore your plugin configuration file if needed
4. Update the plugin list through the plugin management interface

Customization

You can customize the server default page by replacing the files within the ServerDefaultPage/templates/default directory. Once done, you must deactivate and reactivate the plugin through the plugin management interface, else, your changes will not be taken in account.
