Howto reconfigure i-MSCP

Just run the setup script as follow:

```
# /var/www/imscp/engine/setup/imscp-reconfigure --reconfigure
```

This will cause all questions already seen to be show again.

If you want to specifically change something such as the main IP address for the control panel, you can use directly the **primary_ip** flag and just answer the questions.

```
# /var/www/imscp/engine/setup/imscp-reconfigure --reconfigure primary_ip
```

You can type **−−reconfigure help** for get a list of all reconfiguration flags.
