

Howto reconfigure i-MSCP

For 1.1.0rc2.2 or newer (including git master branch)

Just run the setup script as follow:

```
# /var/www/imsdp/engine/setup/imsdp-setup --reconfigure
```

If you want to specifically change something such as the main IP address for the control panel, you can use directly the ips flag and just answer the questions.

```
# /var/www/imsdp/engine/setup/imsdp-setup --reconfigure ips
```

This will cause all questions already seen to be show again.

For 1.0.3.0 or earlier

Ask on our forum.
